The New Mexico Economy: Recent Developments and Outlook

18th Annual Data Users Conference
Jeffrey Mitchell, BBER Director
Rapid Post-election Analysis

- Short and medium term tradeoff between heightened uncertainty for businesses and consumers and likely fiscal stimulus (infrastructure, tax cuts).
- Greater concern for longer-term outlook as many analysts expect increased federal deficits and higher interest rates.
- Specific measures – some suggested in outline of President-elect’s 100 Day plan. Impacts will likely be highly uneven – winners & losers.
- Roll back of Obamacare – shake up in insurance and healthcare markets. Most think changes will not be overnight.
- Tax reform: lower marginal rates for individuals and corporations; however, without changes in spending policy, deficits will grow rapidly.
Rapid Post-election Analysis

- Likely rollback of various business regulations, including environmental regulations, which will impact the energy sector (and others).
- Changes to US immigration policy may impact undocumented workers, including and individuals with HB-1 visas. Impact on labor markets likely.
- Re-working of international trade agreements (such as NAFTA and others) including possible initiation of import quotas or taxation with countries such as China. Likely higher inflation.
- In short – **uncertainty**. Cabinet selections may be early signal.
## Real GDP Growth

US Employment Situation

US Nonfarm Employment and Unemployment Rate, Monthly SA

- Total Nonfarm Employment (Left Axis)
- Unemployment Rate (Right Axis)
IHS Pessimistic Scenario

All Forecasts completed in October & do not reflect election results.

- Global and political risks trigger **uncertainty** and damage business confidence.
- US economy suffers brief recession in second half of 2017 as productivity and business investment suffer.
- Dollar strengthens as it becomes even more of a safe haven – US exports are negatively impacted thereby worsening the trade deficit.
- Modest demand-side pressure put upward pressure on wage and price inflation prompting the Fed to raise rates aggressively in the near-term.
- Oil markets tighten quickly pushing oil prices up in the near-term.
- Consumer & business confidence falls, causing both consumer spending and equity markets to fall sharply.
- The Fed is forced to return to rock-bottom interest rates and oil markets again retreat.

Global Insight October 16
New Mexico Review
New Mexico Economic Current Situation

- Weak economy impacted by decline in oil prices, but we have likely reached the bottom.
- Anticipate 4,000 new jobs in 2016 (0.5%), down from 7,850 jobs (1.0%) in 2015.
- Between 2015:Q1 – 2016:Q1 average job growth decelerated each quarter – 1.5%, 1.3%, 0.8%, 0.4%, 0.2%, respectively.
- Losses in oil & gas and related industries (e.g. mining -4,700 jobs, -18.4%) nearly offset gains in healthcare (-4,700 jobs, -4.1%).
- CES data indicated improvement in 2016:Q2 (5,400 jobs, 0.7%), but a surprisingly weak Q3 (1,600 jobs, 0.2%).
- Labor force continued to contract in 2016:Q2. Unemployment rate down to 6.2% in Q2 but back up to 6.6% in 2016:Q3.
- Personal income growth only 2.1% in 2016:Q2 because of sharp declines in mining employment and average wages.
Divergent Geographical Patterns of Growth

- Decline in oil prices is having uneven impact on New Mexico economy.

- In 2016Q1, Albuquerque MSA added >6,000 jobs (1.7%) while non-metro NM lost -5,380 jobs (-1.7%); state total (1,625 net jobs, 0.2%)

- Gross receipts in oil producing counties were down $3.0 billion (-15%) but up $670 million (1.9%) in the rest of the state in Jan-June timeframe.
Change in Gross Receipts by County
(January – June 2016, Year-over-Year)

Source: NM Taxation & Revenue Department, RP-500
Impact of Oil Price Collapse on State Finances

- Decline in oil prices continues to wreak havoc on State finances.
- In July alone recurring revenues down 11% from year earlier; Gross receipts collections down 8.5%; Oil & Gas related revenues down 36%.
- Special Session cut budget by 2.7%; further cuts likely in 2017 session.
- Oil production down 7.4% in 2016Q2 (vs. 2015Q2), value down 27.1%.
- Expect production losses to flatten by end-2017 but benefits to State finances will lag.

New Mexico’s Permanent Funds

- Mission: “to maximize distributions to the state's operating budget while preserving the real value of the funds for the future generations of New Mexicans.”

- FY2016 distribution = $849 million.
- Statutory avg. distribution = 5%.
- Proposals to allocate 1.5% to early childhood programs have failed.
- NM has no designated Stabilization Fund – unlike WY, OK, TX.

- New Mexico Private Equity Investment Program (NMPEIP) = $262.2 million.
  - Current holding = 5.8%
  - Statutory limit = 9%
  - Target share = 5%

**State Permanent Funds**

- Texas: $54.9 Billion, $73,160 Per Capita
- Alaska: $53.9 Billion, $9,497 Per Capita
- New Mexico: $19.8 Billion, $9,497 Per Capita
- Wyoming: $5.6 Billion, $73,160 Per Capita
- North Dakota: $73,160 Per Capita
- Alabama: $73,160 Per Capita
- Utah: $73,160 Per Capita
- Louisiana: $73,160 Per Capita

---

Bureau of Business & Economic Research
THE UNIVERSITY OF NEW MEXICO
New Mexico Economic Outlook: 2016-2022

- Economic impacts of oil collapse will lessen in second half of 2016, and reach the bottom by mid-2017 – though fiscal impacts will linger.

- Employment growth: 5,300 jobs (0.7%) in second half of 2016, and 7,800 jobs (1.0%) in 2017 and 1.2% thereafter.

- Short-term job growth is in Metro areas, esp. Albuquerque, but slightly negative in non-metro areas. Stronger statewide mid- and longer-term growth occur when non-Metro moves positive.

- Composition of new jobs:
  - 55% (2017)/38% (2018-2022) in education and healthcare & social assistance
  - 36% (2017)/26% (2018-2022) in low-wage service sectors
  - 12% (2017)/19% (2018-2022) in mining, utilities, construction, manufacturing, transportation
  - 12% (2017)/9% (2018-2022) in financial and P&BS

- Outlook for government employment weak (-0.9% in 2017, 0.3% thereafter).

- Income outlook slow: 2.4% in 2016, rising to 3.6% in 2017, and 4.6% through 2022. Wage growth to private sector workers key variable.
